-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 6 are rejected under 35 U.S.C. 102(a) as being anticipated by Brady et al 2002/0003496.

Brady et al discloses a method of making a transponder including bringing transponder 320 into electrical communication with transmission elements strips of antenna circuits 318 on tape 310 followed by cutting the tape in a direction perpendicular to the longitudinal direction of the tape [0031-0032, fig.5-7]. The antenna extends longitudinally as recited because it has a size measured in that direction. The transponder is glued because it is held fast as if by gluing.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brady et al '496 as applied to claims 1-4 and 6 above, and further in view of the following argument.

Brady et al does not disclose contacts in the corners of the transponder circuit. It would have been obvious to one of ordinary skill in the art to locate the contacts as recited because the contacts would have

been expected to perform equally well in those locations on the transponder circuit and because such positioning does not provide any unexpected advantages or solve any problems in the disclosed process.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Fourson whose telephone number is (571) 272-1860. The examiner can normally be reached on Monday through Friday.
